Screening, Brief Intervention, and Referral Training (SBIRT) for adolescents

April 12, 2021 5:30–6:30 p.m.

Online Training Facilitator: Dr. Dane Minnick

The American Academy of Pediatrics recommends adolescent substance use screening and education as part of routine care, using the universal SBIRT process developed by the Substance Abuse and Mental Health Services Administration. Join us in this simulation to learn basic facts about adolescent substance use, as well as techniques to screen patients and conduct brief interventions to drive positive change in health behaviors.
